

markoastm®

The **Marko ASTM** collection is a multinorm, permanently flame retardant line that complies with both EN-ISO and ASTM international certifications.

This collection has been designed to protect against electric arc, flash fire, electrostatic risks, high visibility requirements, and small acid splashes, among others.

Marko ASTM has been tested for both domestic washing (EN ISO 6330) and industrial laundering (EN ISO 15797), offering

excellent mechanical strength that ensures outstanding durability, while maintaining the comfort and soft touch characteristic of the entire Marko line.

In addition, this collection can be laminated to create garments with enhanced weather protection, and it holds EN 343 certification.

It also provides excellent color fastness to light, rubbing, and perspiration, guaranteeing a long garment lifespan.

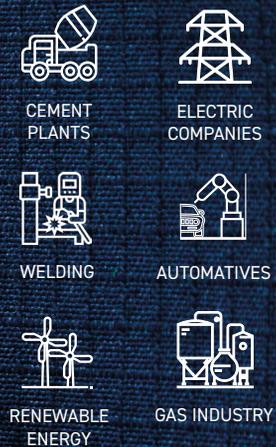

Mrko ASTM is a multi-standard, permanently fire-resistant collection certified according to american standards
